

# 15TH THROUGH 19TH STREET MILL & RESURFACE PROJECT City of Riviera Beach Neighborhood Improvement Project **CASE STUDY**

Enhanced project outcome through expert best practices and communication.

## Challenges

- Lack of survey for impacted areas
- Poor original design resulting in drainage issues
- Collection of accurate field data
- Poor communication of project needs

## Benefit one

Streamlined project administration and management processes, ensuring efficient communication and coordination.

## Benefit two

Timely preparation of reports and design drawings, facilitating decision-making and progress tracking.

## Benefit three

Accurate cost estimates provided at different design stages, assisting with budget planning and financial management.

## Benefit four

Effective contract administration with clients, ensuring project progress and compliance with contractual obligations.

## Objectives

This project entailed conducting field investigations, preparing preliminary reports, providing design drawings, and offering cost estimates at various stages of design completion. It showcases Motre's adeptness in coordinating design reviews among staff, administering contracts with clients, and facilitating effective communication between stakeholders. This project underscores Motre's proficiency in project administration and management, making it an excellent example to highlight their administrative services.

## Solutions

Motré utilizes its project administration and management expertise to coordinate field investigations, prepare reports, and provide design drawings at various design stages. This ensures accurate cost estimates and effective contract administration, addressing challenges like data deficiencies and drainage issues. Through meticulous data collection and improved client communication, Motré enhances project outcomes by minimizing inaccuracies and rectifying design flaws.
